

Superheat™ Burners

Superheat Slot Burners offer jet-convection band of heat for fast localized heating

Where a process requires a band of heat, Selas Superheat Slot Burners provide the same high heat release characteristics of individual SH-4 Superheat Burners in a single assembly. Selas Superheat Slot Burners are available in seven standard sizes with slot lengths from approximately 7 to 60 inches.

The slim, compact shape of these burners facilitates fixturing close to the work piece, even in crowded conditions. They may be positioned on either their short or long axis in relation to the work. Installation is simpler compared to multiple individual burners since only one gas/air connection (up to three on longer units) is required.

Unit Burner Data

Slot Length (in.)	Burner Screens	Gas/Air Inlets	Model No.
7	2	1	138011
10 ³ / ₄	3	1	136255
14 ⁵ / ₈	4	1	133177
18 ³ / ₈	5	1	128464
26	7	1	131033
41	11	2	135672
60	16	3	137146
